Scan 'n Sew

Memory Craft Scan 'n Sew

JUST IMAGINE THE THRILL OF SEEING YOUR ORIGINAL IDEAS AND DRAWINGS COME TO LIFE IN BEAUTIFUL EMBROIDERY.

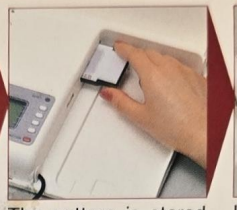
Have you ever longed to design your own embroidery patterns, or wanted to turn a child's drawing into an embroidered keepsake? Scan 'n Sew represents a revolutionary new combination of scanner and sewing machine that lets you release your creativity and add that special touch to hand-made items. It automatically converts scanned images into embroidery patterns and stores them on a memory card. Just insert the memory card into the Memory Craft 8000, then watch as your designs are transformed into professional-quality embroidery. With Scan 'n Sew, you too can be a master craftsman!

JUST SCAN AND SEW···IT'S SO EASY!

Use the scanner to copy the drawing. (The area the scanner can read at one pass is 5.8cm square, or roughly two inches.)

The design read into the scanner is converted into stitching patterns and appears on the digital display.

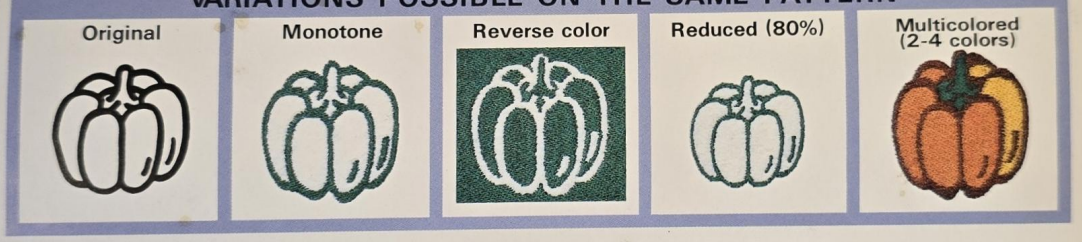
The pattern is stored in the memory card. Once a pattern is recorded this way, it can be recreated for embroidery any number of times.



Insert the memory card into the sewing machine and start sewing. The Memory Craft takes over and automatically embroiders the pattern.

The finished pattern, embroidered beautifully.

VARIATIONS POSSIBLE ON THE SAME PATTERN



USE YOUR OWN DRAWINGS OR LETTERING.

TAKE ILLUSTRATIONS FROM MAGAZINES, ETC.

<WARNING> It is unlawful to use this scanner to produce items in violation of copyright and trademark laws.
